

Global Declaration

***Fukushima Nuke Wastewater Release:
Crime Against Humanity***

WE, Citizens of the World, gathered here today in Manila, Philippines, on March 18, 2023, in unity and solidarity for the welfare of all Humanity and its future generations, denounce and protest the release of radioactive wastewater from the TEPCO Fukushima Daiichi Nuclear Power Plant.

This release of contaminated wastewater must not be allowed to proceed lest the oceans of the world and the food chain be poisoned by radionuclides such as Tritium, Carbon-14, Strontium-90, Cobalt-60, Iodine-129, Rutherfordium-106 and Cesium-137 that can harm all organic life. Another daily 100-tons of contaminated wastewater is built up every day to be released subsequently if this is not stopped at the very onset.

The decision to dump contaminated water ignores human rights and International Maritime Law, and peoples and nations of the world, from the most populous to the smallest Pacific Islands are opposed to the release of this toxic wastewater into the oceans.

We come together today to sign this joint statement which we shall bring to our counterparts in other nations to join and take common action.

Signed:
